## Invasive Plant Management

japanese knotweed specialists

### What we do

Invasive Plant Management provides solutions to residents, land owners, property developers and Local Authorities with invasive plant problems.

We provide advice and surveying services to best advise our clients of the options available to them when faced with Japanese Knotweed or other invasive species on their property or development site.

In our contracting role we also provide the necessary manpower and equipment to execute the chosen solution from start to finish. This includes post-works monitoring / maintenance for all projects.

### Our Techniques

We have developed a number of techniques to deal with Japanese Knotweed and we specialise in methods that reduce the amount of material to be sent off site, which saves our clients money.

**1** Dig Sift and Burial

**2** Herbicide Treatment

**3** Dig and Dump

**4** Partial Excavation

**5** Stockpile

For more details of all our services, please contact Invasive Plant Management **086 813 6636**
